# JAYA KIRAN SUDANAGUNTA

Bengaluru, India | +91-9573205902 | jayakiransudanagunta37@gmail.com | LinkedIn | GitHub | Portfolio

## PROFESSIONAL SUMMARY

Frontend Developer skilled in building responsive web applications using React.js, Next.js, TypeScript, and Tailwind CSS. Developed three projects covering AI-powered report explanations, food ordering and chef booking, and hospital appointment booking. Experienced in REST API integration, state management with Redux Toolkit and Zustand, and form validation. Seeking an entry-level Frontend Developer or React Developer role.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
**Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap 5, React Router, Swiper.js
**State & Architecture:** Redux Toolkit (RTK), Zustand, Context API, React Hooks, Component-driven design
**API & Integration:** REST APIs, Axios, Google Gemini API, Formik, Yup, JWT Authentication, Razorpay, Vercel Deployment API
**Database & Tools:** MySQL | Git, GitHub, GitLab, VS Code
**Methodology:** Agile/Scrum, PR-based code reviews, SDLC

## PROJECTS

**AI-Powered Medical Report Analysis** Live Demo

*Next.js · React.js · TypeScript · Google Gemini API · Vercel*

- Built an AI-powered web app where users upload a report and get a simple, plain-language explanation instead of reading the entire document.
- Integrated the Google Gemini API to analyse the uploaded report content and generate the explanation, key points and important insights.
- Handled the request/response flow between the frontend and the API layer, processing the AI output into a clear, structured format for display.
- Developed the interface with Next.js, React and TypeScript, using typed components and API interfaces for safer, more maintainable code.
- Designed a simple upload-and-results experience aimed at non-technical users trying to understand complex medical reports.

.

**RecipeHub — Food Delivery & Chef Booking Platform** Live Demo

*React.js · TypeScript · Tailwind CSS · Zustand · React Router · Swiper.js*

- Designed a dual-feature platform combining restaurant food ordering and personal chef booking for in-home visits.
- Built the chef booking flow with cuisine selection and time-slot selection for in-home visits.
- Built a multi-page React Router architecture, including a tabbed Restaurant Detail page with a floating cart bar.
- Created a Chef Detail page with profile, signature dishes, reviews and a sticky booking sidebar.
- Implemented Zustand for global cart state with real-time total calculations and persistent state across 6+ pages.
- Styled a fully responsive UI with Tailwind CSS for mobile and desktop, and used Swiper.js for interactive sliders.

**Vadamalayan Hospitals — Appointment Booking System** Live Demo

*React.js · TypeScript · Axios · Formik · Yup · Razorpay*

- Developed a booking UI for doctor browsing and consultation scheduling across 10+ doctor profiles.
- Integrated REST APIs via Axios to fetch doctor data and handle booking requests.
- Validated patient forms with Formik + Yup, eliminating invalid submissions.
- Configured the Razorpay payment gateway with full success/failure handling so bookings confirm only after verified payment.

## EDUCATION

**B.Tech — Information Technology — Prakasam Engineering College, Andhra Pradesh**
2019–2023 | CGPA: 6.47/10

## CERTIFICATIONS

Full Stack Development — Pyspiders, Bengaluru
Python 101 for Data Science — IBM Cognitive Class
